

Robusta Type (height: 2.6 à 3.8m)

# 901

With the Valery's hardiness and the Grande Naine's yield

- Very big bunches
- Very long fruits
- Suited to challenging cropping conditions

	To choose for:		
	Conventional agriculture	With regular deleafing*	In nitrogen limiting conditions**
Bunch weight (kg)	52	46	34
Ratooning (j)	183	180	253
Fruit number	242	247	194
Fruit Length (cm)	24	23.3	21.4

The data comes from a varietal trial conducted in the French West Indies from 2019 to 2022.

\* a difference of -3 leaves relative to the control (conventional agriculture) was maintained throughout the cycle. The harvest was carried out at 0 leaves.

\*\* nitrogen soil concentration below 50 mg/kg, the critical threshold.
