

Giant Type (height: 2.5 à 3.1m)

# 902

## Our worldwide benchmark

### THE GROWERS' FEEDBACK:

- Productive in various environments
- High horticultural quality in a nursery setting
- Easy to manage, from field to shed

	To choose for:		
	Conventional agriculture	With regular deleafing*	In nitrogen limiting conditions**
Bunch weight (kg)	45	41	34
Ratooning (j)	195	184	251
Fruit number	249	246	222
Fruit Length (cm)	22.8	21.5	21.1

The data comes from a varietal trial conducted in the French West Indies from 2019 to 2022.

\* a difference of -3 leaves relative to the control (conventional agriculture) was maintained throughout the cycle. The harvest was carried out at 0 leaves.

\*\* nitrogen soil concentration below 50 mg/kg, the critical threshold.
