

Robusta Type (height: 2.8 à 4m)

# POYO

Our selection of a classic

- **Hardy** - maintains its yield despite seasonal stresses
- **Cylindrical bunches** - omogeneous fruit size throughout the bunch

	To choose for:		
	Conventional agriculture	With regular deleafing*	In nitrogen limiting conditions**
Bunch weight (kg)	45	40	32
Ratooning (j)	175	189	251
Fruit number	213	203	176
Fruit Length (cm)	23.8	22.6	21.3

The data comes from a varietal trial conducted in the French West Indies from 2019 to 2022.

\* a difference of -3 leaves relative to the control (conventional agriculture) was maintained throughout the cycle. The harvest was carried out at 0 leaves.

\*\* nitrogen soil concentration below 50 mg/kg, the critical threshold.
